

## Board Paper 2014.3

### Reviewing of paper proposals and full papers by board members

All CPRsouth board members were requested to review research proposals and full papers as part of the agreed-upon conference paper selection process. Each board member was sent 12-13 paper proposals and 5-6 full papers to review. However some board members were not able to send the reviews on time. The table below depicts the performance of board members.

Only four members met both deadlines. Ten completed their duties within a five-day grace period. Those who failed to submit created significant problems for the admin partner. Their inaction increased workload for others.
