The conditions in which ‘development’—the process by which people, individually and collectively, enhance their capacities to improve their lives according to their values and interests—operates have significantly changed in the global information age, a period characterized by the technological revolution in information and communication, the rise of the networking form of social organization, and the global interdependence of economies and societies. This volume aims to redefine the means and goals of development in this new context; first, by characterizing the specific mode of development, informational development, that the authors consider to be the driver of the creation of material wealth in the twenty-first century; secondly, by reconceptualizing human development as the fulfillment of human wellbeing in the multidimensionality of the human experience, ultimately affirming dignity as the supreme value of development; thirdly, by examining the relationship between informational development and human development.

After first setting out its analytical framework, the book brings together a diverse set of empirically-rich case studies to illustrate this investigation from across the globe—Silicon Valley, Costa Rica, Chile, South Africa, Finland, the European Union, and China—and concludes by attempting to reconceptualize development. It raises important questions and provides observations, including examining the concept of ‘dignity as development’, to contribute to a policy debate that should provide specific answers linked to the conditions of each society, and be enacted by democratic institutions in a concerted global effort to save humankind while there is still time.

University of Chile, and a doctorate in Sociology from the École des Hautes Études en Sciences Sociales, Paris.

Manuel Castells is University Professor and the Wallis Annenberg Chair in Communication Technology and Society at the University of Southern California, Los Angeles. He is also Professor Emeritus of Sociology and of City and Regional Planning, University of California, Berkeley, as well as Director of Research in the Department of Sociology, and Fellow of St John’s College, University of Cambridge. He has been Professor and Director of the Internet Interdisciplinary Institute, Open University of Catalonia, Barcelona. He was Distinguished Visiting Professor at the Massachusetts Institute of Technology (2004–09), and Distinguished Visiting Professor at the Oxford Internet Institute, University of Oxford (2009–11). He has published 26 books, including the trilogy *The Information Age: Economy, Society and Culture* (Blackwell, 1996–2003) and *Communication Power* (Oxford University Press, 2009). He was a founding board member of the European Research Council and also of the European Commission’s Institute of Innovation and Technology. He holds 18 Honorary Doctorates from universities around the world. He received the 2011 Erasmus Medal from Academia Europaea, the 2012 Holberg Memorial Prize from the Parliament of Norway, and the 2013 Balzan Prize from the Balzan Foundation.

Isidora Chacón is Professor at the Information School of the University of Costa Rica. She has also been a professor at the National University of Costa Rica. She has been Director of Research of the Ministry of Education in Costa Rica, as well as Director of Methodology at the Judicial School of the Costa Rican Supreme Court. She has also been a researcher and policy advisor on human development as part of various international research teams, including the United Nations Development Program. She holds a master’s in Sociology from the National University of Costa Rica and a doctorate in Education from La Salle University, Costa Rica.

Nico Cloete has been the full-time Director of the Centre for Higher Education and Transformation in Cape Town since 1997. He is also Extraordinary Professor of Higher Education, University of Western Cape; Visiting Professor, Masters Programme in Higher Education, University of Oslo; Honorary Research Fellow, University of Cape Town; and is a part of the Centre for Higher Education Trust and Centre of Excellence in Scientometrics and STI.
Policy, Stellenbosch University. He was actively involved in academic staff organization and was President of the University of Witwatersrand Staff Association (1991–2) and General Secretary of the Union of Democratic University Staff Associations of South Africa (1993–4). He was the research director for the Nelson Mandela-appointed National Commission on Higher Education (1995–6) and served on the South African Ministerial Advisory Council for Universities. He initiated the Higher Education Research and Advocacy Network in Africa (HERANA) in 2009 and is the coordinator of this network. He has published widely in psychology, sociology, and higher education policy. His latest books are *Higher Education and Economic Development in Africa* (2011), and *Shaping the Future of South Africa’s Youth: Rethinking Post School Education and Skills Training* (2012).

**Alison Gillwald** is Executive Director of Research ICT Africa, an ICT policy and regulatory think tank based in Cape Town, South Africa, which hosts an Africa-wide research network. She is also adjunct professor at the Management of Infrastructure Reform and Regulation Programme at the University of Cape Town Graduate School of Business. She served on the founding Council of the South African Telecommunications Regulatory Authority (SATRA) and the first Independent Broadcasting Authority prior to that. She has chaired the national Digital Broadcasting Advisory Task Team and served on the African Communications Ministers’ Expert Panel. She has advised and been commissioned by regional bodies, governments, regulators, and competitions commissions on the continent, and multilateral agencies, including the African Development Bank, infoDev, the Commonwealth Telecommunication Organisation, the International Telecommunications Union and ICANN. She is widely published in the areas of telecommunications and broadcasting policy and regulation, gender, and political economy.

**Pekka Himanen** is Professor at Aalto University in Helsinki. He is one of the best-known researchers on the Information Age, whose books have been translated into over twenty languages. After obtaining his PhD in Philosophy from the University of Helsinki at the age of 20, Himanen moved to carry out research first in England and then in California (Stanford University and the University of California, Berkeley). The best-known publication of this research is his book *The Hacker Ethic and the Spirit of the Information Age* (2001). With Manuel Castells, Himanen has also co-authored the influential

book *The Information Society and the Welfare State* (2002), which has been discussed worldwide in leading academic and political circles. Himanen’s work has been recognized with several awards, such as the World Economic Forum’s respected Global Leader for Tomorrow Award in 2003, and his appointment by the WEF as a Young Global Leader in 2005. Himanen has advised leading global organizations and corporations, from the United Nations to Silicon Valley companies. He is also a co-founder of the Global Dignity initiative with Crown Prince Haakon of Norway and John Hope Bryant, a member of President Obama’s advisory council on financial capability; an initiative that operates in over fifty countries throughout the world. The Global Dignity initiative includes Nobel laureates Professor Amartya Sen, Archbishop Emeritus Desmond Tutu, and President Martti Ahtisaari of Finland, as well as Sir Richard Branson and Ambassador Andrew Young as its Honorary Board members. Himanen has given invited keynote speeches in leading international forums, including a talk to the CEOs of the world’s 60 biggest information technology companies, and the concluding speech of the World Economic Forum meeting, jointly with Desmond Tutu. He has received an award from the Government of Finland for the quality of his university lecturing. Currently, Himanen divides his time between as Professor at the Aalto University and Visiting Scholar at UC Berkeley.

**You-tien Hsing** is Pamela P. Fong Family Distinguished Chair in China Studies and Professor of Geography at University of California, Berkeley. She is the author of *The Great Urban Transformation: Politics of Land and Property in China* (2010) and *Making Capitalism in China: The Taiwan Connection* (1998), and co-editor of *Reclaiming Chinese Society: The New Social Activism* (2010). She holds a PhD in City and Regional Planning from the University of California, Berkeley.

**AnnaLee Saxenian** is Dean and Professor at the UC Berkeley School of Information. She is the author of the acclaimed *Regional Advantage: Culture and Competition in Silicon Valley and Route 128* (1994), which explains the innovative dynamism of Silicon Valley through a comparison with its East Coast counterpart. She currently serves as Chair of the Advisory Board for the National Science Foundation’s Directorate on Social, Behavioral, and Economic Science. Saxenian’s book, *The New Argonauts: Regional Advantage in a Global Economy* (2006), examines how immigrant engineers from Silicon Valley have transferred technology and entrepreneurship to emerging
regions in their home countries, from Taiwan and Israel to China and India. Saxenian’s other publications include *Silicon Valley’s New Immigrant Entrepreneurs* (1999) and *Local and Global Networks of Immigrant Professionals in Silicon Valley* (2002), along with dozens of articles in refereed and popular journals. She holds a PhD in Political Science from MIT, a master’s in Regional Planning from UC Berkeley, and a BA in Economics from Williams College, Massachusetts.
